

## Course Testimonials

"Jackie's teaching style is captivating!! The course content is excellent with fantastic video cases. Helps consolidate understanding of the series and stages of the periodic table and provides insight into implementation of Scholten's methodology to case analysis. Extremely worthwhile – Thankyou!"

Jackie Jones, North West College of Homeopathy Student

"I have found the course Jackie has presented on the Lanthanides has transformed my practice and given me fantastic tools to work with in the form of new remedies and in depth knowledge of these remedies. Jackie has a fantastic way of presenting the information in a down to earth, accessible manner and made what could have been a complicated subject simple and accessible to the group. Thank you."

Emma Colley RSHom

"I am attending Jackie's Lanthanide course at the moment. She encourages lively discussion & participation & I find her teaching clear & informative. Her sessions are always interesting & thought stimulating. In short, I think she is an excellent teacher & very well qualified to deliver Scholten's ideas."

Moira Cahill RSHom

"I signed up for the Lanthanide Course Jackie was going to teach and found her teaching clear, concise and thorough. Tuition was clear, the handouts easy to understand, plenty of discussion and interesting video cases."

Anna Pawley RSHom

"Studying the Lanthanides with Jackie has been like a light-bulb going on. Not only has it been fascinating to learn new remedies but it has also clarified how to use the periodic table as a tool. It is so refreshing to be liberated from the Repertory!"

Cath Donovan RSHom

"I have followed Jan Scholten's teaching methods and can say that this is the first time I have been able to understand series and stages fully.

This is due to Jackie's clear teaching, combined with her use of case studies and videos to illustrate the remedies."

Sue Hladky RSHom

"Jackie presents her Lanthanide course professionally, clearly and systematically. She makes working with the periodic table more easy and accessible and draws on her years of study with Jan Scholten and clinical experience."

Helen Whalley RSHom

"This course gives prescribers a method to instantly identify hints which signify the Kingdom, Period and Group that resonate with a patients state - and with an unprecedented degree of accuracy."

Stephanie Nile, NWCH Student

"Jackie is a pleasure to listen to and interact with...whether you are a mineral, plant or animal! With clarity and structure she presents her ideas and understanding of the PT, especially the Lanthanides. You are sure to come away from any training day with a spring in your step and confidence to prescribe from this wonderful group of remedies - a revelation. Enjoy."

Carmel Searson RSHom

"Jackie's course on the Periodic table and the Lanthanides has been very enjoyable and more importantly extremely useful in my Practice. Consisting of a mixture of video cases and group discussion supported by course handouts I still refer to on a weekly basis, I look forward to each of the course days as I know that I will leave with fresh ideas on tricky cases. I now understand the periodic table in a way I never imagined and am growing in confidence in prescribing Lanthanides to patients old and new. The knock on effect has been that I am busier than ever as my results have improved as I work to understand my patients on a deeper level."

Nicola Holdcroft RSHom

"Jackie's teaching method is very open and honest and gives everyone the opportunity to offer input and ask questions. A great learning opportunity and has for me, given homeopathy a structure with which to work. I would highly recommend the course as it gives such good and solid grounding with which to start working with the Lanthanides."

Sara Davenport RSHom

"Jackie's teaching is enthusiastic, clear and generous. She teaches by sharing her mistakes as well as her successes. She has a wealth of experience in prescribing using Scholten's methods, and brings her experience to life through the use of a wide array of video cases. She encourages students to develop their intuitive observational skills as well as a deep understanding of the periodic table."

Clare Degenhardt RSHom

"Although I'd been in practice for 8 years before attending Jackie's lanthanide course, I hadn't used the periodic table as a method of prescribing, and I knew next to nothing about the lanthanides. By the end of the course I was using lanthanides with 90% of my patients and getting good results, while still learning from my prescriptions. Jackie is an inspiring and enthusiastic teacher who uses a wide range of teaching methods so that her course was always interesting, relevant and fun. I would definitely recommend her teaching to anyone interested in expanding their homeopathic skills."

Gill Upham RSHom

"Jackie is an exceptional teacher and has developed a real understanding of the Lanthanides through her in depth study and her own clinic work. She is able to demonstrate the effectiveness of this method through her teaching and through her video cases, which include follow ups. Jackie's presentation is clear, organised and enthusiastic."

Christine Abernethy RSHom

"I found Jackie's passionate teaching on the periodic table really inspiring! Her explanation of the series and stages was exceptionally clear, with memorable analogies, video cases and excellent notes. This comprehensive coverage of the periodic table was an essential foundation in order to really understand the elements of the Lanthanide series, and their combination with other elements in the Lanthanide salt remedies. Jackie utilises creative ways to engage and hold the attention of all participants, irrespective of their prior knowledge of chemistry and the periodic table."

Safiya Parker, NWCH Student

"Jackie is an inspirational teacher who teaches in a methodical structured way. She has a great command of the Periodic Table and is entertaining to listen to - a great teacher."

Renata Wilde RSHom

"Jackie is a brilliant, extremely enthusiastic teacher and easy to learn from. Her knowledge of the Periodic Table is thorough and new material is constantly being built up from her years of experience using this system."
